EQUITABLE LIFE OF IOWA

OVER \$290,000,000.00 OF INSURANCE IN FORCE

Iowa's Own Company

The Equitable of Iowa is distinctly an Iowa institution. It was the first life insurance company established in Iowa. It was founded by Iowa men. It is managed by Iowa men. It invests its money in Iowa farm mortgages. Inspired by integrity, the "home folks" of Iowa have shown unusual confidence in this company which is so much a part of Iowa tradition.

Its Successful Record

is a tribute to the confidence of Iowa people in their pioneer company. That it has doubled in size in less than four years is due, not only to its moderate rates and large annual dividends, but also to the loyalty of its policyholders. The greatest assets of the Equitable of Iowa are its satisfied policyholders.

Introduction

The volume herewith presented to patrons embodies the thirtieth edition of the Des Moines City Directory. Especial care has been exercised to secure a thorough enumeration of the residents of the City and its manifold business interests. The work presents as complete and comprehensive a Directory as it is possible to produce, having in view the volume of information assembled for compilation.

The several features of the Directory which have given such satisfaction to patrons in former issues have been retained, while several have been amplified and improved, as suggested by experience. The standard attained in the previous issues is fully maintained in this one and the Directory will prove to meet the needs and requirements of patrons as fully as its predecessors.

The statistics presented in this introduction are impressive as indicating the wealth, industry and culture of the city and of the territory of which Des Moines is the center.

The Directory has five distinct departments arranged in the order following:

The **Miscellaneous Department**, included in pages 33 to 66 contain information concerning State, City, County and Township officers, Asylums and Hospitals, Cemeteries, Churches, Courts, Federal Officers, Insurance Companies, Libraries, Military Societies, Clubs, Fraternal and Benevolent Societies, Newspapers and Periodicals, Post Office, Railroads and Secret Societies.

The **Alphabetical List** of citizens, business firms and corporations is embraced in pages 67 to 1388.

The **Valley Junction Residence and Business Directory** occupies pages 1389 to 1419.

The **Street and Avenue Guide and Directory of Householders** covers pages 1391 to 1692.

The **Classified Business Directory** or 'Buyers' Guide is included in pages 1693 to 1975; this department shows the manufacturing, mercantile and professional occupations compiled under headings appropriate to the class of industry pursued or professions followed.

POPULATION OF GREATER DES MOINES.

The Federal Census of 1920 credited Des Moines proper with a population of 126,468 a gain of 40,100 or 46.4 per cent over the census of 1910, but the canvass for this Directory taken over two years after the Federal census, covered not only Des Moines proper but a large outlying suburban territory. The total number of names in the present Directory is 56,501 in this number is included no firm name, church, school, institution or anything else which does not stand for the name of an individual. Using the multiple $2\frac{1}{2}$ —to allow for the names of women and children not represented in its columns—we have 141,252 as the estimated population of the territory covered by the Directory canvass.

LOCAL GOVERNMENT.

The city is administered under what is known the country over as the "Des Moines Plan," a type of commission rule. A Mayor and four Councilmen are elected for a two year period without regard to party lines or city location, and they, upon election, divide among themselves the duties of the five departments, Public Affairs, Accounts & Finances, Public Safety, Streets & Public Improvements, and Parks & Public Property. The transition from the old aldermanic plan was effected at an election June 30, 1907, and there is no agitation for a return to the former methods.

(Furnished by L. B. Jeffries, Industrial Secretary, Chamber of Commerce.)

BUILDING.

The following is the record of building permits and cost of construction since 1915:

1915.....	757.....	\$1,873,616
1916.....	856.....	3,387,896
1917.....	982.....	2,640,469
1918.....	670.....	4,110,566
1919.....	1,220.....	5,266,185
1920.....	938.....	4,191,230
1921.....	1,348.....	3,720,545

HEALTH AND SANITATION.

The total number of deaths for 1920 according to the city health authorities was 1668.

The total number of births for the same period was 2719.

Elevations above the city base, which is 774.74 feet above sea level, range upwards to 228 feet.

The average yearly temperature is 49.3 degrees.

The highest average month is July with 75.5 degrees F.

The lowest is January with 20.4 degrees F.

The mean Temperature Winter is 23.4.

The mean Temperature Summer is 73.0.

The average precipitation (inc. snow) annually is 32.45.

Annual average snowfall 34.2 (10 inches snow equals 1 inch rain).

The average humidity the year round is 79.8 at 7 A. M.

The average humidity of the year round is 63.4 at 7 P. M.

As noted in foregoing outline we top the list of cities of the nation as regards typhoid from water supply. There is no prevalence of epidemics of any sort. As all other sections of the country we suffered from influenza in 1918 but national health authorities minimize this danger henceforth.

The city owns a hospital valued at \$150,000 and a detention hospital at \$25,000 additional.

LIVING ACCOMODATIONS.

Housing accommodations are as good, if not better, than any city of similar size and placement in the nation. Testimony offered before the Senate Committee on Reconstruction and Production, in session here November 12, 1920, estimated a shortage of at least 1,000 dwellings. This shortage, due to lack of construction during the war period, abnormally high prices during the post-war years, etc. has been accentuated by the rapid growth of the city (46.4% for the past ten year period). That this has been taken care of to a considerable extent is evidenced by report of the Iowa Housing Commission that of the 1,582 dwellings erected in the fourteen cities of the first class (15,000 or over) in Iowa for the fiscal year ending June 30, 1920, 929 or almost two thirds were built in Des Moines. 600 dwellings in addition to duplex and apartments were built during the city's last fiscal year ending April 1st, 1921. The present outlook for construction is very promising.

The population of Des Moines according to the 1920 Federal Census was 126,468. The Newspaper Feature Bureau placed the 1921 population at 131,527. R. L. Polk & Co. in their latest City Directory estimates the actual population, including several small neighboring incorporations served by the street railway and other utilities and dependent upon the city for support, at more than 140,000. Those actually living within the confines of the city in 1920 divide themselves into 30,157 families. According to Federal Census figures Des Moines leads the nation in percentage of home owning citizens—51.1%.

The cost of living varies from month to month and is very difficult of ascertainment. Home owning means gardens, poultry, etc., and it would be safe to say that taken by and large, the cost of sustenance here

is somewhat less than that of the country at large as outlined from month to month by the National Industrial Conference Board, Dun's, Bradstreet, and other reliable sources. A Municipal Market House costing \$130,000 provides direct contact between the city and the surrounding farm products.

FIRE PREVENTION.

With the excellent water supply, pressure and reserve noted the city is fortunately situated as regards the all important feature of fire protection. The number of men employed in the Fire Department is 200. The total number of pieces of fire apparatus is 28, all motorized, and the value of same is \$184,896. Fire alarm boxes, hose, cables, tools and supplies total \$89,710. Real estate and buildings for the 15 stations reach a value of \$237,692. There is 33,000 feet of hose in service. The total fire loss, insured and uninsured, for the year 1920 was \$1,008,898 on valuation of buildings and contents involved of \$17,462,332. There were 1472 alarms. A new Building Code is now in process of preparation based upon the specifications of the National Board of Fire Underwriters. This will wipe out 190 points of deficiency in rating. A new pumper at the water plant better the situation 169 points. A new oil and explosive ordinance in course of preparation will take care of 190 points. These and other matters now being taken care of will raise the city from 4th to 2d class National, which is a rating enjoyed by only the better protected cities.

LAW ENFORCEMENT.

The police force under the Superintendent of Public Safety numbers 138 persons, including the executives and office assistants. There are 88 patrolmen and traffic officers, 6 sergeants, 3 captains, Chief and Asst. Chief and 5 special officers. There are 20 detectives under a Chief of Detectives, 3 surgeons, 2 policewomen and 2 matrons.

The Department occupies its own building with the Municipal Court erected recently at an outlay of \$600,000. The value of equipment exceeds \$20,000, of which more than half is motorized equipment. The Detective Department possesses a Bertillon Cabinet with more than 3,000 photographic descriptions of criminals.

The force, as well as that of the Fire Department, is picked by competitive examinations conducted by a Civil Service Commission, business and professional men.

VICE CONDITIONS.

Des Moines has no segregated district.

Her streets are unusually well lighted by an extensive electric system.

The percentage of floating population is small.

Illiteracy is small.

Surrounding, tributary country peopled by thrifty, intelligent population.

ELECTRIC POWER.

The Des Moines Electric Company, privately owned, furnishes service to some 25,000 meters and has a capacity of 25,000 kilowatts. They offer power as cheaply, and in many instances cheaper, than similar utilities in cities making big capital of their cheap power schedules. This is due largely to an abundance of steam coal mined in and around the city, and hydro-electric power generated from the Des Moines River. Iowa's bituminous coal output has approached nine million tons, in a single year, the state being eighth in the nation in production of this commodity. Heat properties represented in British Thermal Unit range as high as 15,251; Calories, 8,473. More than three thousand miners alone are employed in what may be termed the industrial district of Des Moines, many mines being within the city limits. Power schedules in wholesale quantities are based on either Connected Capacity, Actual Demand or Guaranteed Monthly Consumption. The company will gladly quote specifically when requirements are outlined either in person or in writing. Reduced rates for off-peak use are written under all forms of contracts. The current is A. C. 60 cycle. Residence lighting charges are 6.6c per kilowatt hour for all current used.

GAS.

The Des Moines Gas Company is a private corporation, with a capacity of 5,000,000 cubic feet daily. There are 250 miles of mains and approximately 30,000 meters. The present net price per thousand, irrespective of quantity consumed, is \$1.24.

The present consumption amounts to approximately 900,000,000 cubic feet per annum, leaving ample reserve for emergency and expansion.

The size of mains ranges from 4 to 36 inches in diameter.

The product is carburated water gas, 560 B. T. U. S.

WATER SUPPLY.

The water supply is municipal, being administered by a Board of five Trustees appointed for a term of years by the city authorities.

The approximate investment is \$4,000,000; Miles of mains, 215; Capacity in cubic gallons daily, 60,000,000; Average daily run, 10,000,000. (This insures an adequate supply for fires and other emergencies). The pressure is 30 to 110 lbs. The number of meters is approximately 25,000.

The charge for the first thousand gallons per day is 30 cents; for the next 4,000 or less, 20 cents; and for all in excess of 5,000 gallons per day, 10 cents per thousand.

"Water works engineers regard the typhoid death rate as an indicator of the water supply. The latest available data furnished by the National Board of Health for cities of over 100,000 population shows Des Moines as being at the head of the list."

(Signed) A. T. Luce, Eng. & Supt. Des Moines Municipal Water Plant.

The supply is secured from the Coon River water bearing sand and gravel beds through a system of galleries extending over a broad catchment basin. Gravity propels the water to suction wells from whence it is pumped into the general distribution system. This infiltration process has been very successful and is capable of unlimited extension.

SEWAGE DISPOSAL.

The mileage of the sewer system of the city is over 250 miles, costing \$3,144,113. It takes care of the health situation in excellent shape as evidenced by vital statistics. The city has invested some \$87,500 in a garbage plant, incinerator, and sewage disposal pumping system additional.

STREETS AND HIGHWAYS.

There are over 600 miles of city streets, the municipal area being 54 square miles. Paved streets number approximately 200 miles, representing an outlay of some \$8,000,000. The investment in bridges alone amounts to over \$2,000,000 additional.

Des Moines is on a number of National Highways and through the efforts of the Des Moines Automobile Club these routes have been marked through the city. Among them may be named the Jefferson Highway, Woodrow Wilson Highway, Daniel Boone Trail, River to River Road, D. L. D. Highway, Yellow Diamond Trail, White Pole Road, Panora Speedway, Pawnee Trail. These trails are all well outlined and are rapidly being placed in first class order. The Iowa Highway Commission, with State and Federal aid, is carrying out a program that will eventually give us many miles of paved highways.

TELEPHONES.

The Northwestern Bell Telephone Company serves over some 35,000 instruments. The average number of calls for twenty-four hour period during 1920 was 219,000.

TAX RATE AND ASSESSMENTS.

The actual valuation of Des Moines property for taxable purposes in 1921 was \$172,706,840.

The general levy in 1921 on a 25% valuation which prevails in Iowa, totaled 157 mills on the dollar. This was divided as follows: State 8.89; County 26.01; Municipal, 54.64; Special Water & Light, 10; School District, 67.46. There is a 5 mill light and a 2 mill garbage levy additional within certain districts.

Moneys and credits amounting to \$41,442,816 are not included in taxable valuation shown above. They are taxed at the rate of .5 mills on actual worth.

Corporation stock is taxed on a 1-5th, instead of $\frac{1}{4}$ th valuation and is included in taxable valuation above.

Des Moines has twenty-four Banks and Trust companies.

With sixty odd publications, producing a total of 11,135,000 copies each month, weighing over 1,000 tons, Des Moines ranks fifth in the United States in volume of outgoing second class mail matter. Sixty thousand sacks are used monthly by Des Moines publishers. Every year they print enough to furnish a copy to every man, woman and child in the country.

SCHOOLS, CHURCHES and LIBRARIES.

Des Moines has 110 churches of practically every denomination.

The value of church, hospital and lodge property is roughly placed at \$5,000,000.

There are five well equipped hospitals in addition to the one belonging to the city and several private institutions.

The Independent School District operates 72 buildings, represented in some 60 distinct units. The teaching staff numbers approximately 900 instructors. The enrollment at present exceeds 30,000. The valuation of the property exceeds \$4,000,000. Sites have been secured for two new high schools, for which bonds have been voted. Construction has been started on one of these.

Des Moines has twelve universities, colleges and special schools, with a yearly attendance exceeding 8,000, probably 50% of which is non-resident except through the school year.

The Des Moines Public Library is municipally owned and administered. The property owned is located in the Civic Center on the river front and is valued at \$475,000. Last published report shows 119,821 volumes, in addition to 10,040 pamphlets. The circulation for the fiscal year ending April 1, 1921, reached a total of 358,571.

The Iowa State Library is located in Des Moines. It numbers 177,303 volumes. It is largely made up of reference works.

FACILITIES FOR RECREATION.

There are 850 acres devoted to parks, valuation over \$3,000,000. This includes numerous playgrounds, athletic fields, bathing beaches and two eighteen-hole public golf courses. There are in addition two private golf clubs with eighteen hole links, and one with a twenty-seven hole course.

There are sixteen exclusive motion picture houses, ranging from suburban shows to the larger down-town houses representing outlays of several hundred thousand dollars in single instances.

We have an Orpheum vaudeville house; two popular priced vaudeville shows; the Berchel with legitimate road attractions and part-time burlesque; and the Princess, a stock company of the highest class, River-view Park, an amusement resort, attracts large crowds during the summer months.

The Coliseum and the Auditorium, controlled by civic bodies, present ample space for the larger presentations, including world famous musical artists. These buildings also take care of the steady stream of convention visitors. Many national gatherings convene in Des Moines yearly. The attendance in 1921 figured on a one day basis was 329,295, the number of events 132.

The Iowa State Fair occupies grounds valued at \$1,500,000. The attendance has averaged 400,000 for several years.

The first thirty down-town hotels contain over 4,000 guest rooms.

The Des Moines River offers bathing, fishing, boating and skating in season.

INDUSTRIAL SITES.

Due to the network of rail lines entering the city there is a large amount of trackage available for industrial uses, much of which is served by several main lines and a considerable portion by the Des Moines Union Railway Co. and the Des Moines Terminal Co. with their belt system.

There is a great variety of choice of acreage in and adjacent to the city limits, practically every portion of which is readily accessible to the service rendered by the Des Moines Street Railway company. Detailed information on the cost of well located tracts will be furnished in answer to specific inquiries. Tracts possessing the necessary industrial requirements have sold during the past year for as low as \$1,000 per acre, which is not a great deal above its worth for agricultural purposes. Tracts of lesser size, improved and unimproved, either on or off trackage, may be secured clear up to the business center.

Locations are available for purchase, long term lease, on a flat or revaluation basis, or rental for shorter periods. The price is dependent on the usual factors entering into such transactions, but equally fair with other centers of like size and industrial importance. There is at present somewhat of a shortage in warehouse and factory housing due to the rapid growth of the city and curtailment of building program during the war period and readjustment days.

LABOR.

Factory workers are available in sufficient numbers and wages are dropping with commodity prices and cost of living. The number of persons employed in factories in Des Moines increased 40.1 with 5 year period up to the last Federal census. There is some unemployment at this time, and an evident increased efficiency on the part of those at work.

The total number of persons engaged in business is naturally much larger than those employed in industry proper. It would be safe to say that sales, clerical, educational, civic, utility and miscellaneous classifications amount to many times those of factory workers.

Statistics compiled by the Federal Census Bureau in connection with the 1914 Manufacturers Census (later national figures not assembled) show the relativity of male to female factory workers to have been 79.5 to 20.5. Figures gathered by the Iowa State Bureau of Labor Statistics as of 1919 show the percentage in Iowa to be approximately 16% as regards women. 1919 figures for Polk County, practically identical with the City of Des Moines, show the percentages here to be some 75% men; 25% women. This variance as regards Des Moines is traceable, it is believed, to the absence of large steel and machinery fabricators and to the importance of printing and publishing, proprietary medicines, compounds and apparel lines.

The following statistics based on 1920 Federal Census for Des Moines are applicable here:

White (native parentage).....	78,779
White (foreign parentage).....	28,158
White (foreign born).....	15,218
Negro	4,278
Other races.....	35

Total126,468

The following countries lead in number of foreign born residents:

Sweden	2,921
Germany	2,089
Russia (old empire)	2,027
Greece	1,800
England	1,645
Italy	1,361
Ireland	1,174

The great majority of help in factories is native born as may be surmised from the fact that we have such a small foreign element. In fact, eliminating several Southern cities where there is a very large native colored population, Des Moines ranks third among the cities of the United States in percentage of English speaking and native parentage.

Another fact that stands out is the countries from which our foreign born come, indicating a much higher degree of intelligence, industry and thrift than the average the country over and particularly in other industrial centers.

The ratio of skilled to unskilled workers is probably very similar throughout the United States and local industry is representative.

The wage scales, in the various industries of Des Moines witnessed the marked increases universal the country over during the war period and is now feeling the effect of curtailment in production, falling commodity prices, and considerable unemployment, resulting in gradual readjustment of wages in conformance with the general level.

Hours per day range from 8 to 9½ and per week from 48 to 54.

The average for semi-skilled is approximately 15% higher than common labor.

The average for skilled is approximately 30% over semi-skilled.

Strictly speaking Des Moines factories are practically without exception open shop. Unionization occurs in the large publishing plants, the street railway, packing house, and the field of construction. The Des Moines Business Men's League has for years effectively stood for the American Plan in industry and the Chamber of Commerce in addition to the Manufacturers Bureau has expressed itself in the same manner.

Des Moines has been unusually free from the radical element in industry, due in large part to the preponderance of native citizens. Relative freedom from business congestion and continuous attention to labor matters have also been beneficial. There have been few strikes of consequence in the city's history.

TRANSPORTATION.

Nine of the railway systems of the country enter Des Moines.

Des Moines is not only the logical distribution center for the state of Iowa but for the Mid-West.

She reaches 9,376 miles of Iowa's railroad points (approximately 88%) by a one-road haul which is not approached by any other point.

The systems and the number of radiating lines operated by each follow:

- Chicago, Milwaukee & St. Paul Ry. (2)
- Chicago, Rock Island & Pacific Ry. (7)
- Chicago & Northwestern Ry. (1)
- Chicago, Burlington & Quincy Ry. (2)
- Chicago, Great Western Ry. (2)
- Minneapolis & St. Louis Ry. (1)
- Wabash Railway (1)
- Ft. Dodge, Des Moines & Southern Ry. (1)
- Des Moines Central & Iowa R. R. (2)

There are eight freight depots at present, although only four passenger stations. Plans are under way to consolidate into a new and extensive passenger terminal.

The package or merchandise car service out of Des Moines exceeds one hundred eighty cars daily, in addition to which refrigerator and hot-car service brings the total each day to approximately two-hundred.

Des Moines enjoys fifth morning delivery from New York City daily in its own merchandise car routed via Lackawanna, Nickel Plate and Rock Island.

STREET RAILWAYS.

The Des Moines Street Railway Company, privately controlled, with fourteen distinct lines covers the city quite thoroughly. One hundred thirty-two cars are operated during the rush hours at a present fare of 8 cents. The company operates under a sliding scale "service-at-cost" franchise adopted at an election Nov. 29, 1921, and an early reduction in fares is anticipated.

THE DES MOINES CHAMBER OF COMMERCE.

The Des Moines Chamber of Commerce stands today, not as a new organization, not as the successor of old ones, not founded upon wreckage, not the result of spasmodic and intermittent organization, but as a consistent and potential civic factor dating back to 1888; it has kept pace with the times; it is an ancient and honorable body, and has pride in its heritage as well as in its visions of future possibilities. It is essentially democratic—as any civic and commercial organization must be. It has wisely and constantly widened its horizon, and has been helpful of every phase and factor in city life. It has assisted the women and the boys in their work; it has not forgotten labor; and it has cultivated every outlying nook and corner of the municipal corporation, that there might be known of all citizens that the Chamber of Commerce existed for the general good. It has maintained that hospitality and courtesy, in an organized and distinct fashion, are community assets. It has developed service. The motto of the Chamber of Commerce is this: "To Promote the Welfare of Des Moines and of Iowa." It inclines to the theory that people who are brought to sober thought, and who are wisely led, and whose public conscience is quickened, will make a better citizenship. The Chamber of Commerce is a public forum. It is a clearing house. It is a business organization, a civic body, and a social club. It seeks to put into men the very best of thought and zeal and motives, that the outcome may represent the sum total of achievement. It seeks to be a leader only in that it masses the groups of individual leaders and may perhaps make cumulative the value and strength of their leadership.

DIRECTORY LIBRARY.

A library of City and County Directories and State Gazetteers has been installed by us in the offices of the Chamber of Commerce in the Savery Hotel for the free use of our patrons. As the latest Directories are issued they will be added to the Library, thereby keeping it up to date from year to year. We extend a cordial invitation to each and every one of our subscribers to make frequent use of the Library and to consult the Directories on file as often as desired, when information in regard to any individual, firm, corporation or institution located in other cities is desired.

MUNICIPAL PUBLICITY—ADVERTISING DES MOINES.

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site and as an educational center. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country the publishers place copies of this issue of the Directory, in Directory Libraries which are maintained in all of the larger cities of the country where they are readily available for reference use by the public. There they serve as perpetual advertisements of Des Moines for business men the country over realize that the City Directory represents the community as it really is.
